ABOUT MATT BADIALI

Prior to joining S&A, Matt was a geologist for a drilling company, and served as consultant to an environmental company.

Matt takes a "boots on the ground" approach to his research. His work has taken him to Papua New Guinea, Iraq, Hong Kong, Singapore, Haiti, Turkey, Switzerland, and many other locations around the world.

Matt Badiali's *S&A Resource Report* is read by over 60,000 paid subscribers each month. In addition, Matt is a regular contributor to *Growth Stock Wire*, an e-letter produced by Stansberry Research and distributed to over 370,000 people each day.

PUBLICATIONS

S&A Resource Report

The *S&A Resource Report* is a monthly investment advisory focusing on the best natural resource investments today. Matt has crossed the globe to find the most lucrative new opportunities in energy and metals for *S&A Resource Report* subscribers.

Matt Badiali is the editor of the *S&A Resource Report*, a monthly advisory focused on investments in energy, metals, and other natural resources. Over the years, Matt has recorded an incredible list of triple-digit winners, like Northern Dynasty Minerals (**322%**), Silver Wheaton (**345%**), and Jinshan Gold Mines (**339%**), among many others.

Matt joined Stansberry & Associates in 2005, and takes a "boots on the ground" approach to his research. His work has taken him across the globe and he has built a huge rolodex of the most important people in the industry from private financiers and leading geologists to natural resource analysts and billionaire hedge-fund managers.

His most famous "call" came in 2010 with Papua New Guinea-based InterOil, one of S&A's most controversial recommendations. Despite widespread criticism from short-sellers that InterOil was a fraud, including hedge-fund manager Whitney Tilson, Matt maintained his long position. Unlike the short-sellers, Matt had actually visited InterOil's deposits in person, and saw the geological evidence himself. Less than a year later, Matt was proven right when InterOil finalized a joint venture with Japanese conglomerate Mitsui.

Matt has a B.S. in Earth Sciences from Penn State University, and a Masters in Geology from Florida Atlantic University.
