ABOUT DR. STEVE SJUGGERUD

Dr. Sjuggerud is a former stockbroker, has been a Vice President of a global mutual fund, operated his own hedge fund, and holds a doctorate in finance.

Over his career, Steve has addressed dozens of financial conferences in the U.S. and around the world, including at the New York Stock Exchange.

Steve is the co-author of *Safe Strategies for Financial Freedom*, a best-selling book on investment strategies.

Steve's *True Wealth* and *True Wealth Systems* are read by over 50,000 paid subscribers each month. Steve's *DailyWealth* e-letter is distributed to over 500,000 readers each day.

PUBLICATIONS

True Wealth

True Wealth's philosophy is to buy assets of great value when no one else wants them, and sell them when others will pay any price.

True Wealth Systems

With *True Wealth Systems*, Steve can sift through mountains of data, looking for safe, simple trading strategies using ETFs that beat "buy and hold."

<http://bit.ly/sstruewealths>

Steve joined Stansberry & Associates in 2001. He has found super-safe, profitable investment ideas for his subscribers that the average investor simply never hears about... until the big gains have already been made.

For example, Steve recommended buying gold back in 2002 – when it was trading for around \$320 an ounce – a call that led subscribers who took advantage to gains of **273%**, **206%**, and **182%** in collectible gold coins, and **995%** on Seabridge Gold.

In 2010, Steve made one of his biggest and most important calls to date – what he calls the "**Bernanke Asset Bubble**." In short, when Federal Reserve Chairman Ben Bernanke promised to keep printing money to save the economy for years to come, Steve said, "*The asset bubbles he creates will cause some investments to go beyond what anyone can imagine in the next few years. That is the beginning (and the end) of the story. I believe these artificial asset bubbles will end badly – someday. But that day is years down the road. In the meantime, you could make a ridiculous amount of money...*"

He was also one of the first analysts we know of to **correctly call the bottom and recovery in the housing market** in 2009. His thesis on the "Bernanke Asset Bubble" and the housing recovery has proven correct, and Steve helped position his readers for potentially great gains as a result.
